

▶▶▶ About Us

Square 1 is committed to providing product design and manufacturing solutions that are better, faster, and less expensive than our competition while maintaining quality and transparency throughout!

Founded in 2021 by two partners, with over 26 years of combined experience in product development and manufacturing, who have commercialized many products ranging from consumer electronics to medical devices in both the US and EU countries.

We've designed products for a wide range of customers from inventors and entrepreneurs to MedTech startups and top 100 global medical equipment manufacturers. Our quality background includes ISO 9001 & 13485, FDA QSR, EU MDD & MDR and AS9100 as well as other industry and technology related standards.

PRODUCT DESIGN

SQUARE 1

PRODUCT DESIGN & MANUFACTURING

Product Design & Development

With the contract out of the way, the rubber hits the road on bringing your idea to life!

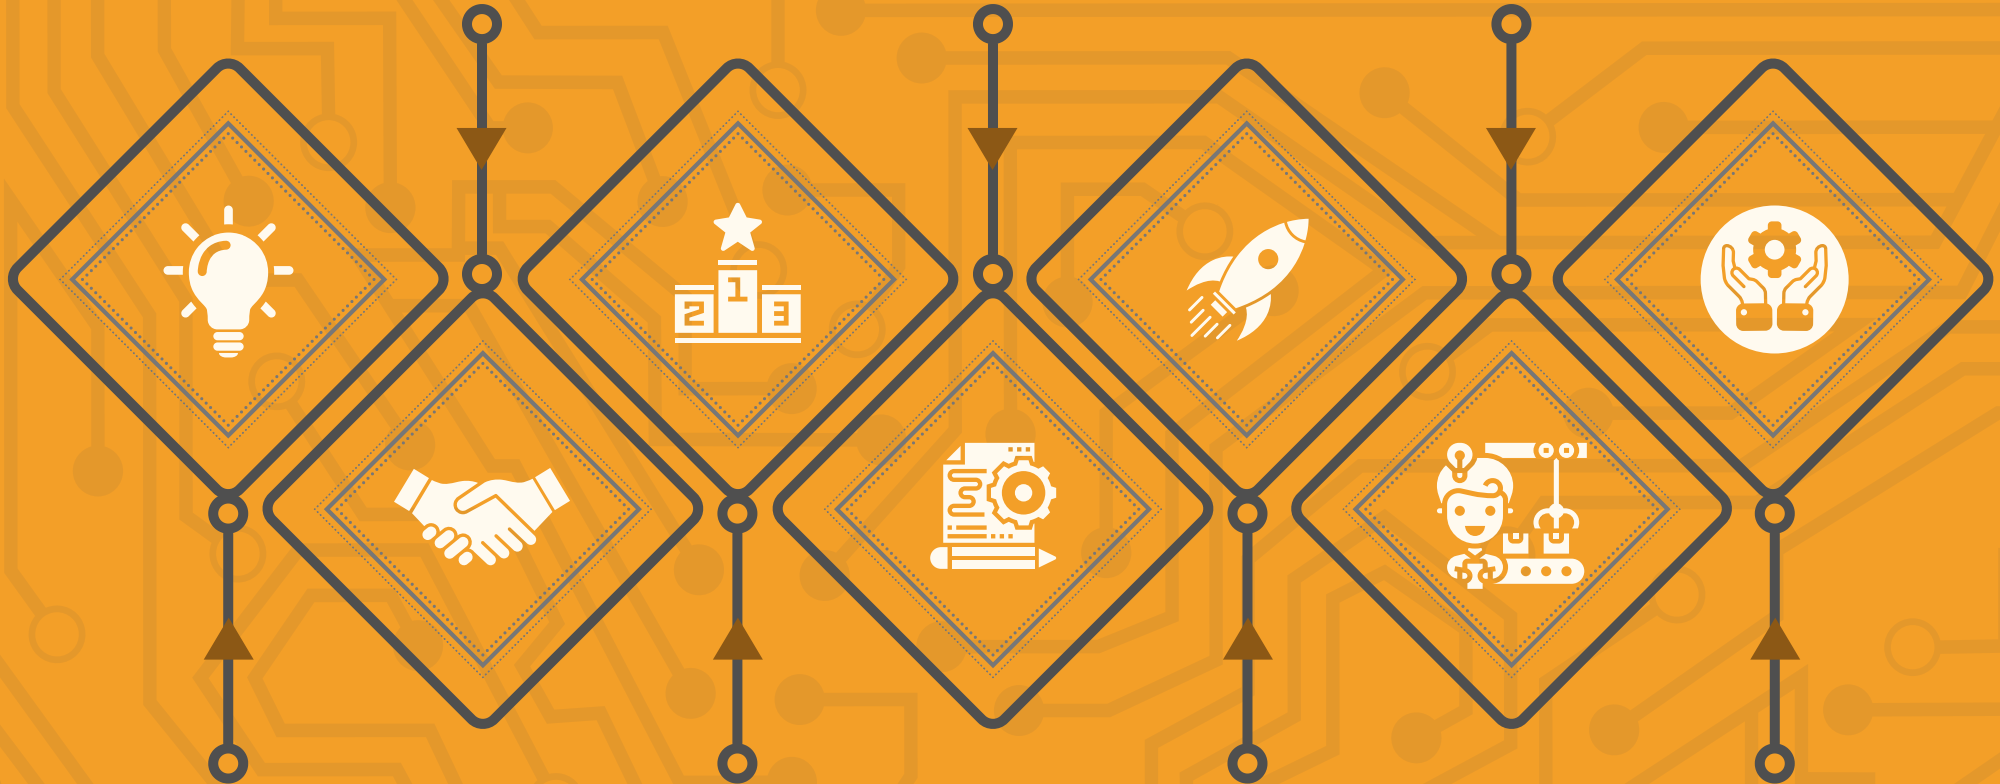

Project Kickoff

Rapid prototyping to confirm product form, fit and function through testing and analysis.

Prototype

Work instructions, forms, process validation, training and QC. At this stage, we are in flight!

Mfg. Transfer

Design Proposal

You will get a detailed Statement of Work with clear expectations and deliverables.

Proof of Concept

Design, modeling, lite prototyping and testing of different concepts for your product idea.

Pilot Production

Tooling, production pricing, pre-production build and performance and safety testing.

Support

Warranty and out-of-warranty repairs, tech support and continuous improvement.
